Protejamos lo que es importante

¿Qué hay en su computador? Fotografías, música, archivos personales, información financiera, acceso de ancho de banda, videos y más. Su computador nunca ha sido más importante, y también, nunca ha estado en mayor riesgo de descargas dañinas de energía y otras molestias.

Como la mayoría de la gente, usted necesita proteger sus bienes. Y al igual que la mayoría de la gente, usted también quisiera proteger el ambiente. Con nuestros nuevos productos conscientes de la energía, puede lograr ambas cosas. Con un diseño que aprovecha la energía eficientemente, nuestros nuevos productos inteligentes protegen la energía de su computador a un costo que es compensado rápidamente con grandes ahorros. ¿Cómo? El nuevo Back-UPS ES® y SurgeArrest® no solamente utilizan la energía sabiamente, también presumen de una característica de salidas maestras/controladas, que de manera automática reducen la energía de los dispositivos en descanso para así conservarla.

De hecho, al tiempo que protege su suministro de energía, nuestra eficiencia energética es cinco veces mayor que la de cualquier otra solución. Al ahorrarle cerca de $40 USD al año en costos de energía, nuestro Back-UPS ES se paga a sí mismo en dos años. Incluso el empaque ha sido cuidadosamente seleccionado y fabricado para maximizar el uso de materiales reciclados y minimizar el desperdicio.

En este mundo, todas las decisiones que usted toma, cuentan. Así que proteja su energía con un respaldo de batería que funcione para proteger el ambiente. Conserva la energía, se paga a sí mismo, y está respaldado por la confiabilidad legendaria de más de 20 años de APC.
